Comtec Solar ranked one of world's top solar wafer firms by Green World

Hong Kong, March 3, 2011 – Comtec Solar Systems Group Limited ("Comtec" or the "Company", together with its subsidiaries the "Group", stock code: HK: 712), a PRC-based leading manufacturer of monocrystalline solar wafers, has been ranked as one of the world's top solar wafer companies.

On March 1, 2011, a reputable green funds' blog -- Green World Investor -- published a list of the world's top solar wafer companies. Ten global wafer firms including Comtec Solar, GCL, LDK and ReneSola were ranked as the top global players in the field.

"It is a pleasure to be appreciated as one of the world's top solar wafer companies. It proves that our faithfulness, dedication to quality and effective conversion rates are bearing fruit and finally getting commensurate public recognition. During the financial crisis, our competitors lost millions of dollars while we achieved a reasonable profit. To survive in this competitive industry, we not only know what we should do, but also what we SHOULD NOT do," said Comtec CFO Mr. Keith Chua.

Green World Investor is primarily a Green Investing Analysis Blog seen through the lens of macroeconomics. The blog also covers issues on technology, climate change, food security, unemployment, trade equality and poverty with emphasis on India and China.

About Comtec Solar Systems Group Limited

Comtec Solar is a leading monocrystalline solar ingot and wafer manufacturer in the PRC. With its production base in Shanghai, it focuses on the design, development, manufacture and marketing of high-quality solar wafers. Comtec Solar, founded in 1999, is one of the first manufacturers in China to be able to mass produce 156mm x 156mm monocrystalline solar wafers with a thickness of approximately 170 microns. It has accumulated strong industry experience in the manufacture of semiconductor ingots and wafers. Comtec Solar currently supplies most of its solar products to the leading solar cell/module manufacturers. Listed on the Main Board of the SEHK on Oct. 30, 2009, it is committed to enhancing product quality as well as developing new and innovative solar wafers. As it is well positioned to benefit from the growth of the solar PV industry, the Company aims to broaden its customer base internationally.
