Comtec Solar Secures Contract to Supply Hi-Efficiency N type Wafer Products to US Based Leading Solar Cell Manufacturer

(Hong Kong, PRC and Singapore, 30 December 2013) — **Comtec Solar Systems Group Limited** (HKSE: 712, “Comtec Solar” or “the Group”), a global leading manufacturer of high quality monocrystalline solar wafers, today announced that Comtec Solar (Hong Kong) Limited (“Comtec HK”), a wholly-owned subsidiary of the Company, entered into a wafer supply agreement with Mission Solar Energy LLC, a Delaware limited liability company (“Mission Solar”).

Pursuant to the agreement, Comtec HK will supply 156mm×156mm N-type mono crystalline silicon wafers representing a total of approximately 500MW for use in solar cells to Mission Solar from June 2014 to July 2017

Mission Solar is a leading international solar cell manufacturer, providing high efficiency solar cells and panels to solar power projects in the United States.

Mr. John Zhang, Chairman and Chief Executive Officer of Comtec Solar, commented, “The wafer supply agreement with Mission Solar implies two facts. First, this is a clear indication of the market share increase for high efficiency N type solar power projects. As we know, although many people believe that the N type wafers/cells will be the future for solar industry, there used to be only a few major N type solar cell makers in the world who are producing N type cells in mass production. Now we are glad to see Mission Solar become another major player in N type solar market. This fact enhances our confidence of the future for high efficiency N type products. Second, the agreement will enable the Group to further strengthen our customer base as well as to gain more business opportunities in respect of the N-type mono crystalline silicon wafer products of the Group. It also serves to demonstrate the competitive advantages of the Group in production technologies and product qualities in the solar industry and our leading position in the high efficiency N-type solar wafer market. With our impeccable business strategies, we are confident that our N type wafer shipment will hit record high and therefore we will be able to realize the sustainable development of the Company.”

-End-

About Comtec Solar Systems Group Ltd (HKSE: 712)

Founded in 1999 and tapped into the solar wafer industry in 2004, Comtec Solar is a leading high quality monocrystalline solar ingot and wafer manufacturer in the PRC and one of the pioneer manufacturers in the PRC able to massively produce Super Mono Wafers which achieve an average conversion rate of approximately 23%. With its production bases in Shanghai and Jiangsu, Comtec Solar focuses on the design, development, manufacture and marketing of high-quality solar wafers and has accumulated strong industry experience in the manufacture of semiconductor ingots and wafers. Currently, the Company supplies most of its solar products to the leading solar cell/module manufacturers. Listed on the Main Board of the HKSE on 30 October 2009, the Company is committed to enhancing product quality as well as developing new and innovative solar wafers. As it is well positioned to benefit from the growth of the solar PV industry, the Company aims to broaden its customer base internationally.
